The Truth of the Matter.

In barring women from Armour Institute

Dean Howard M. Raymond, who was one of

the moving spirits in the matter, is credited

with saying: "The scholarship of the young men will be better with the girls out of

here." As statistics show that the scholar-

ship of men students has not deteriorated

since the establishment of coeducational in-

stitutions, but that, on an average, the

scholarship of the women students has been

just a little bit better than theirs, the dean's

meaning must have been that the scholar-

ship of the Armour Institute young men

will make a better showing after the

women student class has been eliminated.

EVERY INDICATION OF EXCELLEN

LOCAL WHOLESALE TRADE

BUSINESS DURING JULY.

Fruits and Vegetables and on Poultry-Grain Markets More Active.

Prices Are Easing on Seasonable

July opens with better promise of a better trade generally than was enjoyed in June. The trade in June was in excess of that of June, 1902, but was curtailed considerably by high water in territory which draw their supplies from Indianapolis. The indications are that these troubles are about overcome and that trade will soon be moving in its natural channels. There is still much delayed freight on side tracks between here and St. Louis to go to Western merchants, which is beginning to move, but it will be some days before the congestion is relieved. Country merchants are now selling large quantities of goods, due to harvest time, the demand for groceries, such as sugars, coffees and provisions being active. Refined sugars have dropped 5 cents per 100 pounds. The cutting of wheat has been begun in all parts of the State, and by next week will be at its height. This means good business for the grocers and in turn for the wholesale houses. Proons are fast movers at prices quoted, which are some higher than at the correonding period of last year. Dry goods uses look for a quiet month, as little will done except to replenish broken stocks. Druggists are quite busy. Sales of oils and paints are large. Paints have not followed oil in the reduction of prices, as paints now on hand were made when oils were much higher than at present. On Commission row easier prices are the rule all along the Inc. except on Irish potatoes, which are still in light supply. New cabbage, onions and other vegetables of this year's growth are arriving freely and prices are weak. But few of last year's stock of apples are offered and but few oranges are on the market. The produce market, except on poultry, ules steady and firm. Poultry is weaker as he season advances, and butter is hardly is firm as ten days ago. Contrary to extation cerealines of all kinds rule easier and the probability of further advances has been lessened. Flour, however, is still firm. Other lines are without new features.

Indianapolis Grain Market.

Offerings on the grain market are quite beral, as compared with the first of last th. It is evident that farmers are disd to accept the present high range of rices and dispose of a portion of their holdngs of wheat, corn and oats. Track bids

STOCKS AGAIN FALL INTO AN AT-TITUDE OF LETHARGY.

tant, but Mostly Downward - Resume of Monetary Conditions.

NEW YORK, July 1.-The newly awakened hope on the part of commission brokers of a revival of speculation, which prompted the exchange governors yesterday to dismiss the resolution of members in favor of a holiday on Friday, received a setback to-day. All the animation was gone from the market and the apathetic conditions of last week seemed to be renewed in full force. Yesterday's stiffening in the call loan rate to 10 per cent. served to intimidate the trading element. The rate did not go above 6 per cent, to-day and in the late dealings eased off to nominal figures after the principal demand had been satisfied. The course of the call-money market, however, was said to be due to the moderation displayed by stock-market borrowers and the late easing of the rate had no other effect than a moderate recovery from the earlier depression, due to the covering of shorts by professional traders. The recovery halted at about last night's level and the close was rather heavy. Yesterday's sudden advance of over two points in United States Steel preferred, which was coincident with the return to the street after a long absence of a noted operator conspicuous in the flotation period

of the United States Steel securities, had aroused some hope that a renewed bull campaign was to be undertaken in those securities under syndicate auspices, but the inertia of the preferred stock in the neigh-borhood of 82, which is the subscription price offered to employes, strengthened the surmise that price level was the objective of yesterday's movement. Other news of the corporation's affairs caused a hope that the recent pressure of liquidation has been completed, and there were rumors current that the holdings recently in course of liquidation had been taken care of. The second mortgage bonds were lifted about a point during the morning, but did not hold well. London was a conspicuous seller during the morning and this was a remarkable factor in the heaviness of the market. Son recovery in the exchange market also resulted, and an advance in the price of American gold coin in London was also noted To-day's clearing-house balances footed up \$24,597,490, which is close to the high record level and is a reflection of yesterday's heavy financial transactions incident to the turn of the fiscal year. The renewed strength in the cotton market disappointed the hopes that the violent speculation there was near a culmination, and the firmness of the corn market was also a detriment to stocks, although the sharp reaction in wheat was fa-vorably regarded. Atchison, Southern Pa-cific and Union Pacific were carried a point under last night at one time. Hocking Valley fell 5 points with a raily of 2%, and the preferred dropped 3 on account of fears by speculative holders that the as yet unannounced plan of joint control would be accounted by a second by a second by a second be accounted by a second nounced plan of joint control would not yield any benefit to them. The weakness of Colorado Fuel was due to the existence of a large order in liquidation. Sugar suffered from the marking down of the price of the product and the weakness of the London copper market affected Amalgamated. The May net earnings reported by Lehigh Valley and New York, Ontario & Western confirmed the belief in the very favorable conditions in the coal-carrying trade and revived some buying of Reading, but the May reports of St. Paul, Louisville & Nashville and Southern Railway showed the effect of

large increases in operating expenses, St. Paul showing a net return slightly less than the corresponding month of last year. The bond market was quite firm, but not active outside of United States Steel second fives. Total sales at par value were \$2,330,000. United States twos advanced ¼ and the old fours 1/2 per cent. on the last call. Following are the day's share sales and the recorded price changes:

MANY INFLUENCES COMBINE TO MAKE WHEAT WEAKER.

yesterday was rather quiet. Twenty shares of the Union Trust Company were sold at 229 and Corn and Oats Strong for a Time, but Follow the Course of the Leader-Small Gains in Provisions. by a number of local institutions, among them

> CHICAGO, July 1.-Continued liquidation caused weakness in wheat to-day, September closing %c lower. Corn was off %c, and oats were down 4c. Provisions closed unchanged to 15c higher.

The sentiment in wheat was generally bearish and with more rains reported in the Northwest and good harvesting weather in the Southwest there was considerable selling pressure throughout the day. Opening prices were easier on lower cables and better weather conditions, September being shade higher to 14@14c lower at 761/4c to 76%c. Fair buying by commission houses and the advance in corn caused a firmer feeling early in the day and the price advanced gradually to 76%c, but later reacted again on a less urgent demand. The weakness at St. Louis, due partly to the arrival there of several cars of new wheat, was a late bear factor. After selling at 751/2c, September closed %c lower at 751/2@ 75%c. Clearances of wheat and flour were equal to 41,900 bu. Primary receipts were 307,100 bu, against 420,500 a year ago. Minneapolis and Duluth reported receipts of 173 cars, which, with local receipts of 17 cars-none of contract-made a total of 190 cars, against 146 cars last week and 261 a

Corn was strong a large part of the session, due to the efforts of some local bulls to support the market, but the fine growing weather and the weakness in wheat were influences that overbalanced all else, and weakness prevailed late in the day. liveries on July contracts were over 1,000,-000 bu, most of it being put out by elevator interests. After selling between 50c and 511/sc, September closed 1/sc lower at 501/sc. Receipts 351 cars, 40 of contract grade. Oats were influenced mainly by the situation in corn, but the general sentiment was more bearish. Trading was on a fair scale, with commission houses the best buyers, while local longs did the selling. Offerings were too liberal to be readily absorbed and an easier tone prevailed the latter part of the day. September closed 14c lower at 33%c, after ranging between 33%c and 34%@34%c. Receipts were 148 cars. Provisions opened easier on fair receipts of hogs, but buying by both local and outside houses caused a rally, and the market was quite active at times. September pork closed 15c higher at \$15.77\\(\frac{1}{2}\), lard unchanged at \$9.30 and ribs 24.05c higher at \$8.70. Estimated receipts to-morrow: W 25 cars; corn, 390; oats, 180; hogs, 25,000 head. Leading futures ranged as follows:

UNION STOCKYARDS, INDIANAPOLIS, July 1.-Cattle-Receipts, 1,400; shipments, 300. The receipts to-day were over 300 smaller than a week ago and about the same as a year ago. The market, with continued excessive receipts of undesirable cattle, has become about as unsatisfactory to salesmen as they ever experience. stock are also affecting the market for the better grades, and it was indeed in very few instances to-day that sellers believed they got steady prices compared with yesterday. While there is a fair demand there are no urgent orders for any kind, and buyers are a great deal more particular than they have been recently; in fact, to sum up the situation there seems to be no competition for any but the thick fat handy-weight cattle of prime quality. Hogs-Receipts, 5,500; shipments, 1,500. The receipts to-day were 3,500 smaller than a week ago and just a little larger than a year ago. The market opened with all buyers in the field, and with a smaller supply and rather more favorable reports from other places there was active competition for the fancy light hogs, and on account of their scarcity they sold promptly at higher prices, those averaging less than 150 lbs selling generally 5c above yesterday. There was also a strong to higher market for hogs averaging 160 to 180 lbs, and medium to heavy grades were at least steady at yesterday's best prices. Several loads came in after the more important orders had been executed, and the tendency on the closing market was weaker with some few sales closing market was weaker with some few sales showing possibly 5c decline compared with morning prices. The conditions at the extreme close of the day, however, were more satisfactory than yesterday, and a better clearance was made to-day. Sales ranged from \$5.85 to \$6.15, and the bulk of the supply sold at \$5.90\$6.08. Quotations:

Horses-About 175 head of horses arrived for the closing auction sale this week conduc the Blair-Baker Horse Company. About th from that time. There was rather a slow demand for all kinds, but more especially for the horses that were off in quality or under size. It was rather difficult to transfer the consignments, and practically all sales represented a decline of \$10@15 in prices compared with a week ago. There was a better demand for the good heavy chunks and draft horses than any other class, and they suffered less change in prices than others. There were not many sales as high as \$175, but a few extra good ones sold up to \$200, and the bulk of the medium to good chunks and drivers sold at \$100@150, with smaller and less desirable horses at \$25@85.
